One of the reasons why we chose to move our office to the Chrysler Building is its fascinating history. The Chrysler is conveniently located and a major symbol for NY business and commerce. The Chrysler Building is one of the finest buildings in New York City, beloved by tourists and its Art Deco design well known in the world. It was built at a fast pace to compete in Manhattan's run for the tallest building and was the world's tallest building for a short term.

The Chrysler Building is located in the heart of Manhattan at 42nd street, close to the United Nations and right by Grand Central terminal. We could not have thought of a better location for overseeing and developing our operations. New York City is known as one of the world's most important places for trading and commerce; the city has been a magnet for creative talents and minds from all around the world and the Chrysler has been one of the symbols for growth, human ingenuity, innovative design and business. The cultural diversity makes the city unique, dynamic and challenging, which is the perfect framework and social fabric for our global consulting company. The Chrysler Building is a symbol for the global business world and its changing environment: as consultants we advocate change and are constantly working on new ideas. We work together with clients from New York to New Delhi and are excited about this milestone in our company's history.

We would like to welcome all of our clients and contacts to get in touch with us. If you need help with your business, contact us for a free consultation and have a coffee at the Chrysler. We want to help you grow and take advantage global opportunities.

Best Regards
